PA0 – GROUP REGISTRATION & TOOLS SETUP

I. Group Registration

GROUP 05		
Student ID	**Name**	**Role**
19127027	Võ Hoàng Bảo Duy	Team Leader
19127040	Trần Ngọc Lam	Team member
19127064	Lê Minh Sĩ	Team member
19127389	Đặng Kiệt Hào	Team member
19127600	Lê Quốc Trọng	Team member

II. Project proposal

Project name: ChillnFree

- **Introduction:** The purpose of the website is to create a platform for people to easily listen to music, create personal playlists, upload their music products and so on. In addition, the website also features a Pomodoro timer and some focus music for working and studying.
- **Target users:** Students and office workers.
- **Environment:** Web application server, database server, web browser, web application language (HTML, CSS, JavaScript,...).
- **Key features:**
  - Manage account through **signup** and **signin** functions, **change password** and **edit profile**.
  - **Search music** by filter (genre, artist,...) and title.
  - Users can **vote, comment** to discuss or give opinions about songs.
  - Users can **create their playlists** and **publish the playlists** to share to everyone or keep the playlists private.
  - **Upload** function allows users to upload their own musical products to the website. **Download** function allows users to download music from the website for offline listening.
  - The website will **recommend some music** based on the user's search history, favorite genre, favourite artist and so on.
  - **Notify users new music** of their favourite artist and news of their subscribed artist.
  - Users can **add their favorite music** to their account.
  - Have an option of **play, pause, repeating, shuffling,..**
  - **Listening to music with a timer (pomodoro method)** helps to stay focused on work.
